Instructions

"You now will be asked, how well you **currently** can solve a series of actions. Every task will be shown on a picture. Additionally, the question is written above the picture. I will read out every question to you. Please tell me, how well you can solve the action **at the moment**. The questions are **not** about the mobility of your arm, but generally, how you are able to mentally **plan and execute the actions**.

Below each picture there is an evaluation scale. Please show me your capacity on this scale ranging from 0 to 3. Zero means, that you have no problem at all to solve the requested action at this moment. One means minor difficulties and two means serious difficulties. Three means, that it is currently not possible for you to solve the requested action. You can show me your answer by pointing on the appropriate position on the scale. Let's start with a practice item."
