

Figure S2. Stereo view of the electron density maps. (Upper panel) the $2|F_o|-|F_c|$ electron density maps (0.7σ in gray maps) with the positive $|F_o|-|F_c|$ electron density maps (red density) and simulated annealing omit maps (1.2σ in gray maps) showing unbiased electron densities (lower panel) for VPg in the RdRp-VPg(1-73) complex.
