

## Table S2

**Table S2. Toxicity of PEP005 and birinapant in combination**

Agent (concentration)	% replication
PEP005 (10 nM) + birinapant (10 nM)	84.8 %
PEP005 (100 nM) + birinapant (100 nM)	80.8 %
PEP005 (1 µM) + birinapant (1 µM)	65.5 %
PEP005 (10 µM) + birinapant (10 µM)	50.0 %

PBMCs ( $2 \times 10^6$  cells/ml) were treated with birinapant (10 nM - 10 µM) and/or PEP005 (10 nM - 100 µM) and cultured for 3 days. Cell viability was measured by WST-8 assay.
