

Figure S6. Gating strategy to quantify lung inflammatory cells in Figure 5. Cell populations of lung cells were analyzed by flow cytometry (SP6800) and defined as follows: Eosinophils, CD45⁺CD11c^{int}CD3⁻B220⁻CCR3⁺; ILC2s, FSC^{lo}SSC^{lo}CD45⁺Thy1.2⁺Lin⁻Sca-1⁺ST2⁺; and CD4⁺ cells, FSC^{lo}SSC^{lo}CD45⁺Lin⁺Thy1.2⁺CD4⁺.
