

Supplementary data 1 for

Genomic evidence for cryptic speciation in tree frogs from the Apennine Peninsula, with description of *Hyla perrini* sp. nov.

Dufresnes et al., Frontiers in Ecology & Evolution

Content:

Table S1a: Sequences included in the mitochondrial phylogeny

Table S1b: Samples included in the nuclear phylogeny

Table S1c: Localities included in the hybrid zone analyses

Table S1d: Populations sampled for the biometric analyses

Table S2: Variables used in the ecological niche modelling

Table S3: Measurements of the type series

Fig. S1: Localities used in the niche modelling for *H. intermedia* s. s. and *H. perrini* sp. nov.

Fig. S2: PCA on the phylogenomic data

Fig. S3: Morphometric data by species

Fig. S4: Bioacoustic data by species

Fig. S5: Paratypes of *Hyla perrini* sp. nov.

Table S1a: Sequences included in the mitochondrial phylogeny.

<i>H. arborea</i>	Switzerland, Zürich	10	6	47.43	8.62

Table S2: Variables used in the ecological niche modelling (MaxEnt) and their relative contributions (in %) for each species, obtained from jackknife analysis.

	<i>H. intermedia</i> s. s.	<i>H. perrini</i> sp. nov.
Mean temperature of driest quarter (Bio 9)	36.2	8.0
Altitude	9.1	7.2
Land cover	8.6	3.7
Tree coverage percent	6.7	0.5
Temperature seasonality (Bio 4)	6.6	17.0
Precipitation of coldest quarter (Bio 19)	5.7	5.4
Precipitation of wettest quarter (Bio 16)	5.7	0.2
Precipitation of driest month (Bio 14)	4.5	9.9
Mean diurnal range (Bio 2)	4.2	0.3
Isothermality (Bio 3)	2.6	0.5
Slope	1.6	0.1
Mean temperature of wettest quarter (Bio 8)	1.5	5.3
Exposition	1.5	0.4
Terrain roughness index	1.5	0.8
Habitat homogeneity	1.4	1.1
Annual mean temperature (Bio 1)	1.3	24.6
Precipitation seasonality (Bio 15)	0.9	3.9
Aspect	0.4	0.2
Aridity index	0.0	10.9

Table S3: Measurements of the type series (in mm).

	MZL43340	MZL42341	MZL42342	MZL42343	MZL42344
	Holotype (M)	Paratype (M)	Paratype (M)	Paratype (F)	Paratype (F)
Snout Ventral Length (SVL)	43.3	41.7	41.6	40.6	45.3
Head Width (HW)	14.7	15.5	15.9	14.5	16.6
Head Length	12.8	13.2	13.0	12.6	13.6
Tympanum Diameter (TD)	2.4	2.4	2.0	2.5	2.6
Eye Diameter (ED)	4.3	4.1	4.3	4.2	4.4
Eye-Nostril Distance (EN)	4.0	3.6	4.0	3.9	3.9
Nostril-Snout Distance	4.0	3.7	4.2	3.4	4.2
Inter-Nostril Distance (NN)	3.4	3.5	3.3	3.5	3.7
Hand Length	14.8	14.9	16.1	14.0	15.7
Forelimb Length	21.9	22.8	22.1	21.2	24.4
Foot Length	20.9	20.1	20.7	20.0	21.4
Tarsus	12.8	12.2	11.6	12.0	13.7
Tibia Length	19.7	19.6	18.3	18.5	21.4
Femur Length	19.8	19.5	19.4	19.2	23.2

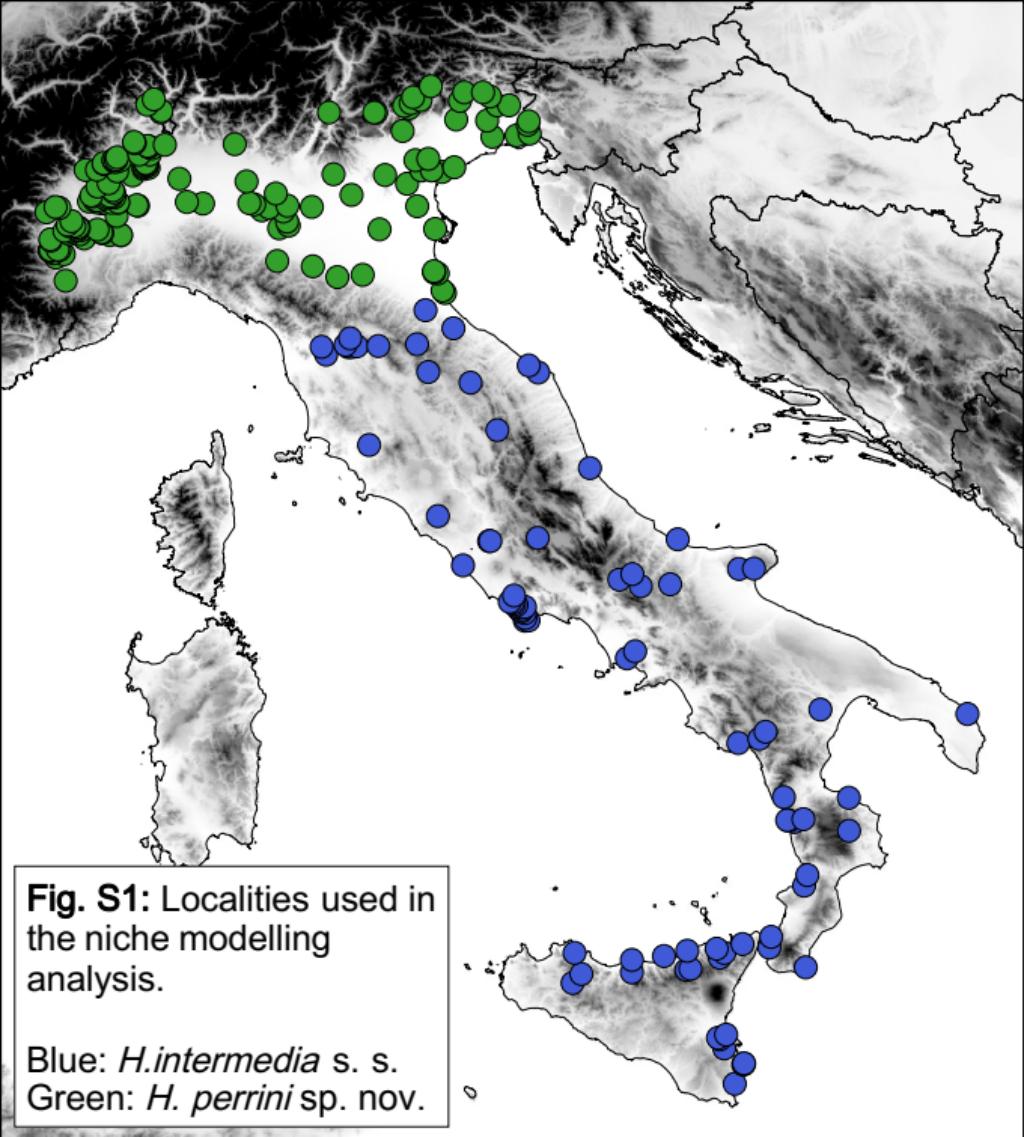

Fig. S1: Localities used in the niche modelling analysis.

Blue: *H.intermedia* s. s.
Green: *H. perrini* sp. nov.

Fig S2: Principal Component Analysis on the phylogenomic data for all Western-Palearctic tree frogs, except the early-diverged *H. meridionalis*

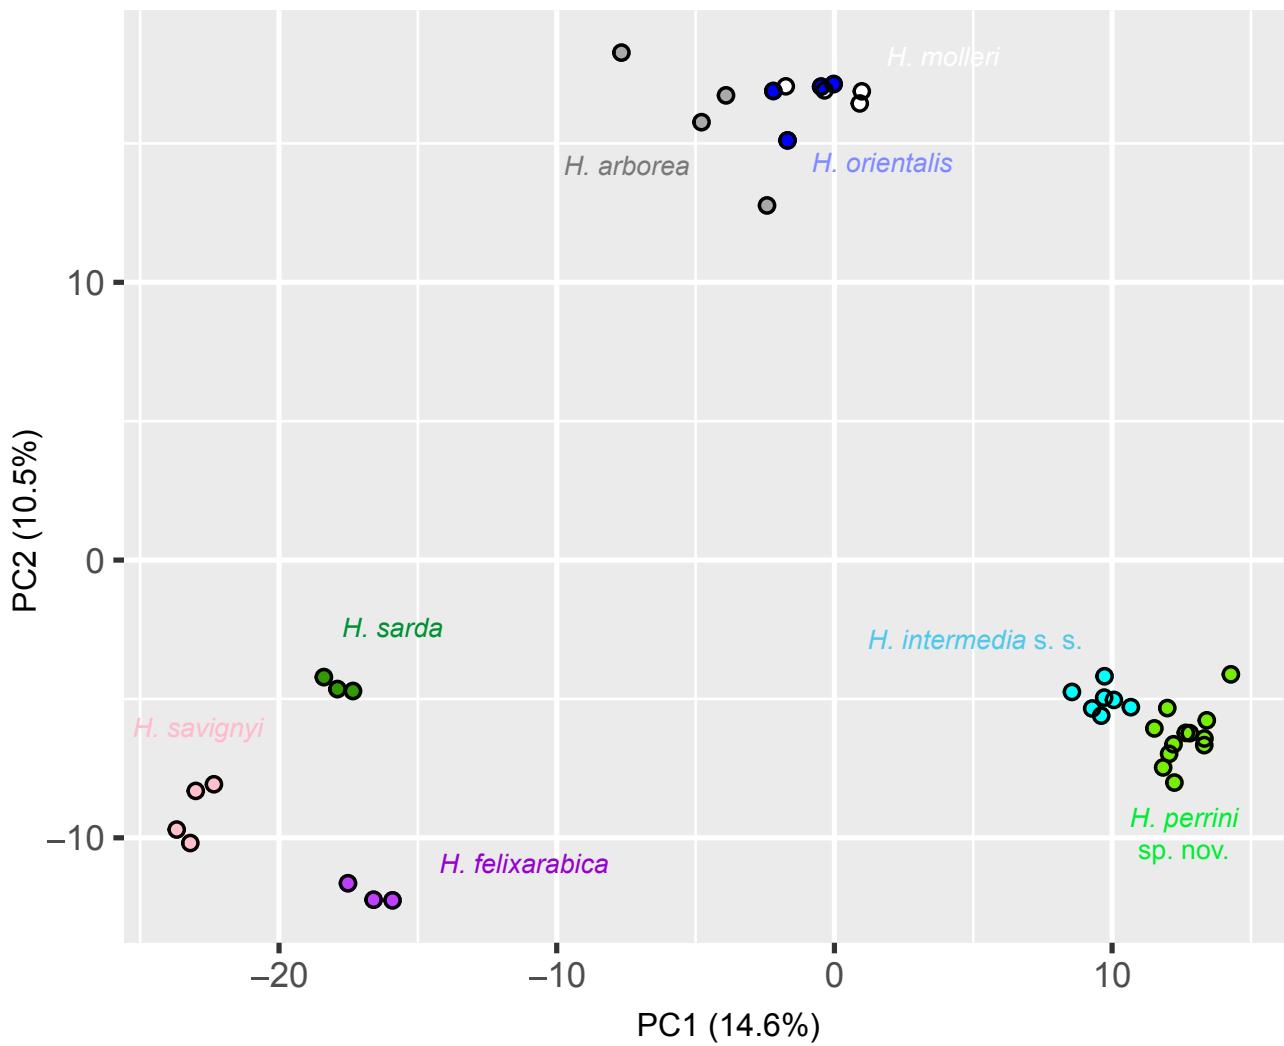

Fig. S3: Comparative morphometrics for *H. arborea* (arb), *H. intermedia* s. s. (int) and *H. perrini* sp. nov. (per). Measurements are corrected by SVL. Variables that showed a species effect in the MANOVA are highlighted by *, and the differing pair(s) of species are shown, when significant (Tukey tests).

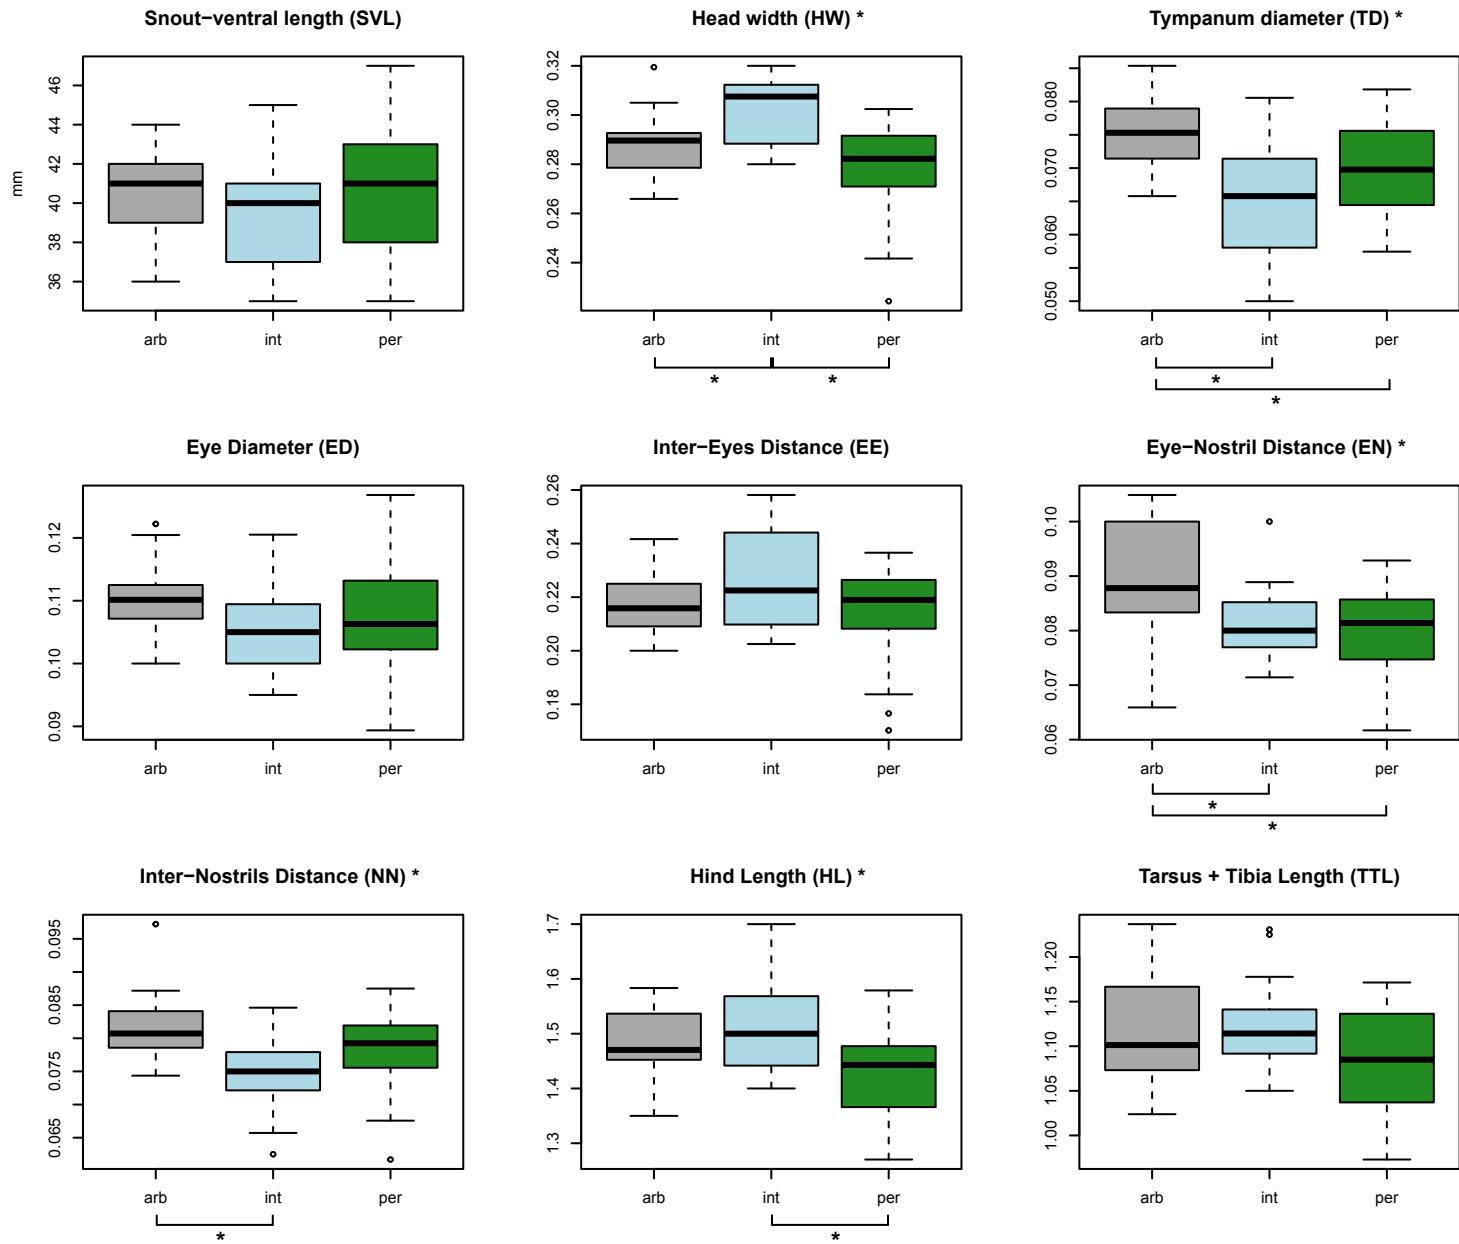

Fig. S4: Comparative bioacoustics for *H. arborea* (arb), *H. intermedia* s. s. (int) and *H. perrini* sp. nov. (per). Variables that showed a species effect in the MANOVA are highlighted by *, and the differing pair(s) of species are shown, when significant (Tuckey tests).

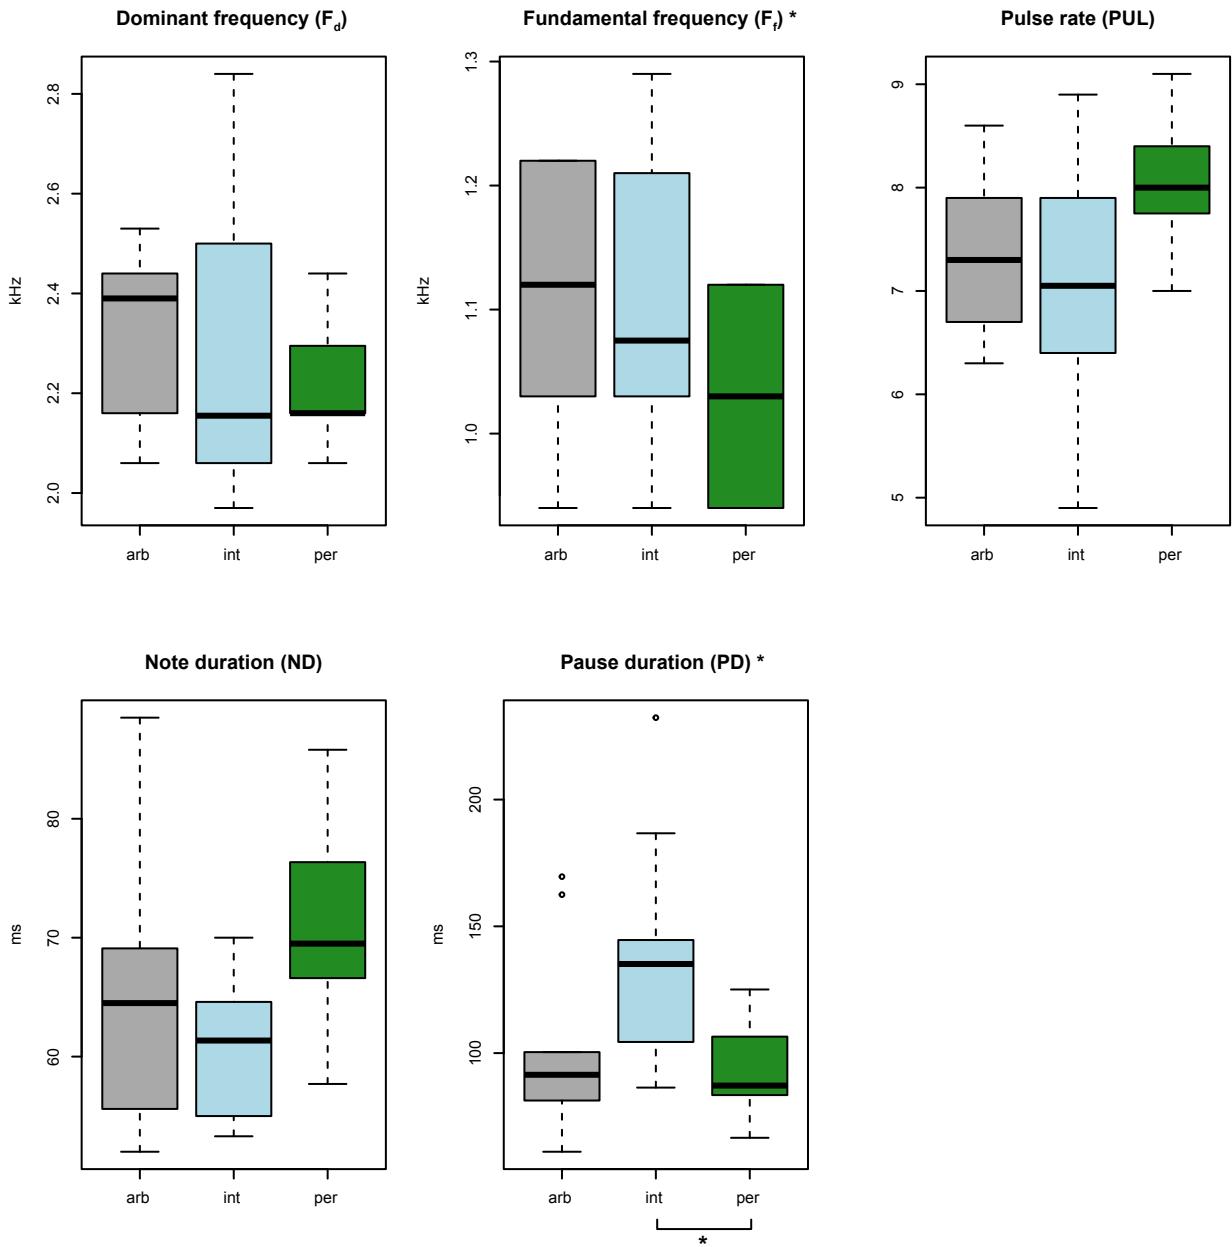

Fig. S5: Dorsal and ventral views of the paratypes of *Hyla perrini* sp. nov., deposited at the Cantonal Museum of Zoology of Lausanne (MZL).
