

Supplementary Material - Tables

Table S1: Percent (%) of survey respondents that had personally experienced specific issues from large carnivore species in southwestern Alberta (n = 116).

	Percent (%) of Respondents				
	Personal/ Family Safety	Livestock Depredation/ Stress	Grain/Feed Damages	Pet Safety	Property Damages
Grizzly Bear	50.0	44.8	24.1	19.0	26.7
Black Bear	44.8	18.1	15.5	22.4	23.3
Wolf	8.6	35.3	0.0	12.9	2.6
Cougar	32.8	27.6	0.0	26.7	0.9

Table S2: Survey respondent ranking of concerns associated with living with large carnivore species in southwestern Alberta. Concerns are ranked from 1 through 5 with 1 being highest concern and 5 being least concern. Respondents were told to use each number only once. Results are presented as the percent of respondents identifying the importance of a given issue (n = 116).

	Ranking - Percent (%) of Respondents					
	1	2	3	4	5	N/A
Personal/Family safety	56.0	18.1	11.2	4.3	2.6	7.8
Grain/feed damage or loss	2.6	12.1	11.2	13.8	25.0	35.3
Pet safety	8.6	20.7	23.3	12.1	18.1	17.2
Livestock depredation/stress	19.8	33.6	16.4	6.0	2.6	21.6
Property Damage	6.0	7.8	20.7	36.2	12.9	16.4

Table S3: Percent of respondents indicating whether they report various carnivore interactions always, more than half the time, less than half the time, or never.

Reason for calling	Percent (%) of respondents			
	Always	> half the time	< half the time	Never
Safety concerns (n = 95)	30.9	14.9	21.3	33.0
Stored grain or feed damage (n = 51)	29.4	7.8	13.7	49.0
Livestock Depredation (n = 52)	46.2	25.0	11.5	17.3
