

## Supplementary Figure 2

*Fig. S2. H<sub>2</sub>S protects CSE-deficient NRK cells against PX-12-induced cell death.* (A) NRK cells were incubated with 20 μM or 40 μM PX-12 in the presence or absence of 1 mM NaHS for 7 h. Cells viability was determined through Calcein-AM/PI staining (magnification: × 400) and WST assay (B). Data in (B) are expressed as the percentage of living cells against the untreated control (mean ± S.E., n = 3; \* P < 0.05, \*\* P < 0.01 vs. control; # P < 0.05, ## P < 0.01 vs. PX-12 alone).
