

Figure S1: Correlation of \log_2 fold changes of gene expression by qRT-PCR and RNA-seq.
The correlation of the \log_2 fold changes of selected gene expression after 30 min of heat stress determined by RNA-seq (x-axis) and qRT-PCR (y-axis) is depicted with corresponding R^2 values for *C. coli* RM2228 and *C. lari* RM2100.
