

Figure S1. Immunofluorescent images of FAA.K1B cells stably expressing FLAG-ADHAPR and FLAG- Δ N16ADHAPR. A) Intracellular localization of FLAG-ADHAPR was assessed in the FAA.K1B cell line stably expressing FLAG-ADHAPR by the immunofluorescence staining. FLAG-ADHAPR was verified with monoclonal anti-FLAG antibody (b) and peroxisomes were visualized by immunostaining with anti-Pex14p antibody (a), respectively. Merged views are shown in (c). B) Intracellular localization of FLAG- Δ N16ADHAPR was likewise assessed. Bar, 10 μ m.
