

Table S13. Generalized linear regression model for Figure 6H, decision times for decoding with gamma tPRP.

decision_time: decision time
 naive_prof_sh: naïve (1), proficient (2) and shuffled (3)
 rewarded_stimulus: S+ high vs. S+ low
 peak_trough: peak vs. trough

Generalized linear regression model:

decision_time~naive_prof_sh+rewarded_stimulus+peak_trough_lick+peak_trough_lick*naive_prof_sh*rewarded_stimulus

Distribution = Normal

Estimated Coefficients:

	Estimate	SE	tStat	pValue
(Intercept)	0.4428	0.36618	1.2094	0.23031
naive_prof_sh_2	3.1143	0.51785	6.0138	6.118e-08
