

Supplementary Figure 5 Expression patterns of 8 chlorophyll-associated genes (*AtLHCB*, *AtHEMA1*, *AtCHLH*, *AtDVR*, *AtPORA*, *AtPORB*, *AtPORC*, *AtCAO*) in wild type and transgenic lines overexpressing *VcMIR156a*. Total RNAs were extracted from 7-day-old transgenic seedlings and wild type. Values were normalized against the gene *AtACTIN8*. Error bars indicate standard errors of three biological and technical replicates, and significant differences are denoted by asterisks: * $P < 0.05$, ** $P < 0.01$.
