

A**B**

Figure S1. BTLA expression on aTregs from SLE patients does not correlate with treatments or age. **(A)** Correlation between BTLA expression (MFI) on aTregs from SLE patients and age. **(B)** BTLA expression (MFI) on aTregs from SLE patients according to treatments. Results are expressed as mean \pm SEM and each dot represents one individual. r, Spearman correlation coefficient; HCQ, hydroxychloroquine; CTC, corticosteroids; MTX, methotrexate.

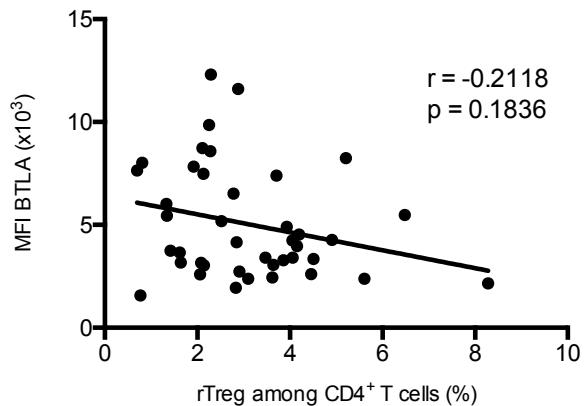

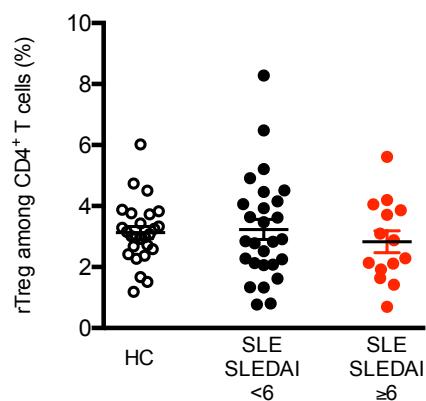

A**B**

Figure S2. BTLA expression on lupus rTregs does not correlate with rTregs frequency. **(A)** Correlation between BTLA expression (MFI) on rTregs from SLE patients and the frequency of rTregs. **(B)** Frequency of rTregs among CD4⁺ T cells from HC (white dots, n=26) patients with inactive SLE or with low activity (SLEDAI<6; black dots, n=27) and patients with mild to severe SLE (SLEDAI ≥ 6 ; red dots, n=14). Results are expressed as mean \pm SEM and each dot represents one individual. r, Spearman correlation coefficient.

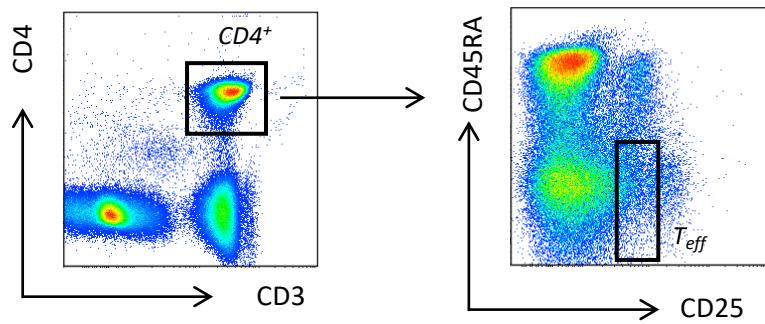

Figure S3. Flow cytometry gating strategy of effector T cells ($CD45RA^+CD25^{int/low}$) defined by CD3, CD4, CD45RA and CD25.
