

Figure A : Mean number of errors of adults (black), TD group (purple), DCD (red), DD (blue) and DCD+DD (green) groups for Block 1 to Block 6 on Letter condition (left) Visuospatial + Letter condition (middle) and Visuospatial condition (right). Vertical bars represent inter-individual variability (standard errors).

Figure B. Illustration of the link between the reaction time and the Attentional score (GZ-F) (a) in Letter condition (b) in Visuospatial + Letter condition and (c) in Visuospatial condition.

Figure C : Illustration of the link between the reaction time and the Visuospatial forward working memory in the Letter condition.

Figure D : Illustration of the link between the reaction time and the recognition of fingers in the Visuospatial + Letter condition.
