

Supplementary Fig. 4

Supplementary Figure 4. Subcellular distribution of the L221V ClC-4 chimeric protein. (A,B) Confocal images of HEK293T cells expressing the chimeric mutant L221V_{LinkerClC-3} alone show extensive plasma membrane localization (A) and (B) overlapping with ClC-3b in co-transfected cells. Confocal experiments were performed in triplicate. Scale bar represents 10 μ m.
